Driving decarbonization and digitalization. Together.

Specialist Logistics Sample

Job description

In your new role you will:

- Act as key point of contact and advisor towards our Global Sample Centers and Shipping Points and drive continuous optimization including management of exceptions
- Manage process documentation and conduct trainings with the user communities as well as related functions
- Establish and be 1st level support of a Sample Warehouse Key User Community, foster best practice sharing, align on needs for enhancement and translate them into Business Requirements
- Implement logistics concepts and strategies for the Global Sample Distribution Network
- Support to resolve operational issues, e.g. clarification of customs, carrier, invoice, or pricing topics
- Be the main interface for Sample Logistics Return and Quality topics and be the Problem Solving Manager
- Monitor process stability and related KPIs and follow up with process owner and sites to analyze factors that impact the KPIs and define corrective actions
- Assist and support setup of an appropriate reporting solution for Global Sample Warehouse and Shipping operations
- Consult internal stakeholders and business responsible and assure the observance of our concepts and global standards

Profile

You are best equipped for this task if you have:

- A degree in Business Administration, Industrial Engineering or similar – ideally focused on logistics or Supply Chain Management
- At least 3 years of professional experience within logistics operations or equivalent function
- Proven deep understanding of Supply Chain interdependencies considering global/local needs and requirements (for specification of business requirements to get transformed into IT solutions)

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.
Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
